FRONT & REAR D SAFETY HARNESS

This two point Y-shaped safety harness is a unisex design with both rear and front attachment points.

Suited for fall protection when used with a compatible safety lanyard to create a fall arrest system. It can also be used for restraint situations. The way this harness is designed allows for a broader range of movement when going about daily tasks. Comfort leg pads are included as standard.

Fitted with additional waist strap for added comfort. High contrast stitching makes inspection easier. The addition of a flexible rear D pad provides additional comfort. The inclusion of an easy slide shoulder buckle increases the range of adjustment. The way the harness has been designed minimises the amount of rigid webbing edges. A variety of devices can be used with the harness, but check for suitability.

- / Unisex design
- / Front & rear attachment point
- / Comfort leg pads
- / Tail tidy to stow excess webbing
